
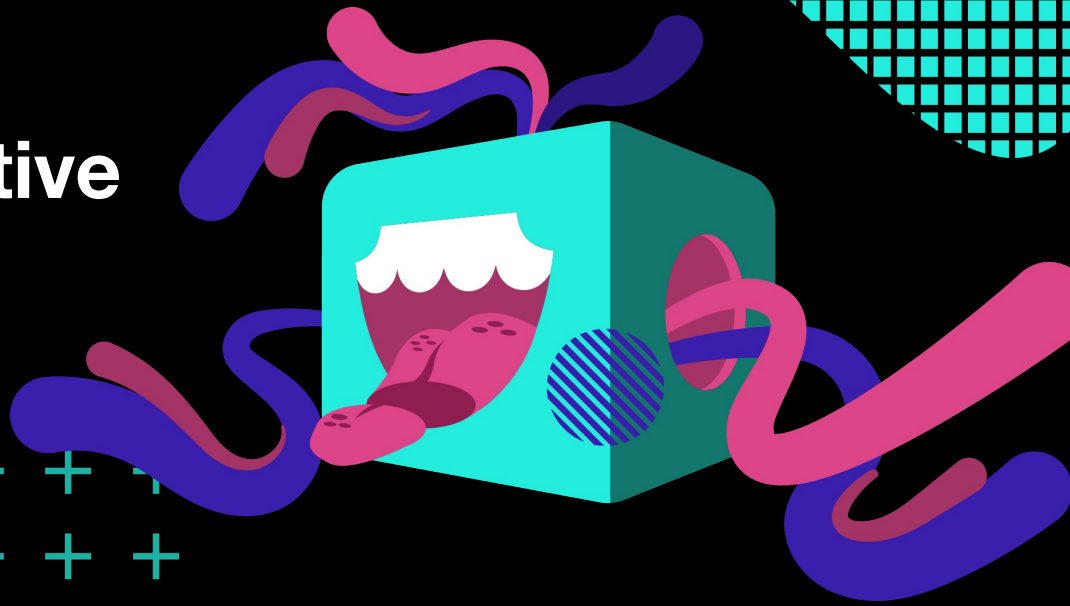
ai for creativity

Introducing the world's first generative creative platform for performance advertisers.



trypencil.com

Work with algorithms to generate advertising language and visuals that are predicted to be creative, effective and on-brand.

How to predict language is creative, effective and on-brand?

Normalization & Data Preparation

1. Normalize column-wise
   a. Some features are unbounded

2. Normalize across features
   a. Row-wise
   b. Still continuous

3. Threshold

[1, 1, 0, 0, 1]
